profile.

I am a Brazilian UX/UI Designer with an Industrial design degree from Universidade Federal do Espírito Santo and I will start a master in Design management at IADE Lisbon in October. Therefore I am looking to create meaningful, intuitive, and beautiful products that people thrill to use. It is essential to me dive in different topics and let curiosity speaks during my work to continue learning and improve my knowledge, skills, and ability to understand others as a designer and as human being. I strongly believe that people do their best job when they're in a collaborative team, building inspiring products. And for that, I strive to create and cultivate the most friendly and supportive atmosphere possible, where people are comfortable with making mistakes and learning with them.
